PROJECTS

Interactive Website Development OF And Institute

Aim: To create a dynamic website of an institute from which users can get details about the college and can register for the college for admission.

Responsibility: Coding, Testing, Documentation, Project Manage & Review

Blood Pressure Prediction

Aim: This study aims to predict systolic blood pressure and diastolic blood pressure based on age and weight and to evaluate the relative importance of each clinical variable used in bp prediction models.

Responsibility: Data Analysis, Model Building, Maintenance, Coding, Documentation.

App Development for Health-Related & Doctor Recommendation

Aim: To create a comprehensive and user-friendly android app that integrates advanced machine learning models for disease prediction and doctor recommendation.

Responsibility: Design Integration, Android Based Coding, Documentation, Database Management, Project Manage & Review.
